

IVWV***

(NEN 3140 & NEN 3840)

Who is the training intended for?

For entry-level and certified Installation and/or Works Supervisors of low-voltage installations and low-voltage networks with a nominal voltage not exceeding 1000 V AC and 1500 V DC and high-voltage end-users.

What will you learn during the training?

Taking responsibility for the reliable operation and/or safe execution of low-voltage work and high-voltage end-users including the preparation of a switching diagram.

Do you need prior training?

WEB4 through training or (work) experience is sufficient. However, knowledge of electrical engineering is recommended.

Duur van de opleiding?

- Basic + certification:
6 class days + 1 exam day
- Recertification:
4 class days + 1 exam day

What can you do after completing this training?

You may be appointed/designated as Installation and/or Works Supervisor to manage, direct and take responsibility for the safe operation of low-voltage work and high-voltage end-users on installations as described.

Normec Inrush making learning engaging

Looking for a certified training provider that prioritizes safety and craftsmanship? We offer high-quality safety training programs that meet the strictest standards, including (Stipel) safety exams. Our courses equip your employees with the knowledge, skills, and confidence to work safely and responsibly with electricity.

We combine traditional in-house training with interactive online modules and realistic practical assignments, creating a direct link between learning and the daily work environment. This ensures that risks and appropriate safety measures are clearly understood and directly applicable.
